The PM DSU generated scorecards data row 11 error message "Assets must have serial numbers" or will not migrate. The NIINS
and material descriptions to the left are associated with an AESIP
Serial Number Profile Label GA08 which identifies equipment that
requires a serial number.

BLUF: Currently, on receipt of chemical protective mask the system will create an equipment record and store a system generated equipment number (slide #3) in the serial number field in most cases. **M-50/51 have human readable serial numbers in each face piece but are migrating as just described.**

LIN/DODIC	Material	Material Description	UoM	Stock	Serial No.	Bin	SCMC	Bench Stoc	FSC	Batch	Restr Stk

- These are the LIN/NIIN combinations for select protective masks. The quantities that migrated for this particular unit reflect in the stock column. The serial no. icon represent equipment that has an equipment record and serial number (data plate or system generated equipment number in serial number field**). In this case all of these assets migrated and the system assigned unique equipment numbers see below.**

- These assets are showing on the PM generated scorecard as requiring serial numbers to migrate. **In this case all of these assets migrated and the system assigned unique equipment numbers see below.**
- **Notice the match in serial number/equipment fields unique equipment numbers**
